Death Bonds

A death bond is an asset-backed security (ABS) derived by pooling transferable life insurance policies, which are then repackaged into bonds and sold to investors. Death bonds can provide...

Death Bond Definition - Investopedia

A death bond is a bond backed by life insurance policies. When the seller of a death bond dies, the buyer receives the benefits from the insurance policy.

Death Bond Definition & Example | InvestingAnswers

Death bonds are a type of bond that is based on a group of life insurance policies. Individuals will sell their life insurance policies to investment companies and the companies will then package the policies together to form bonds. This type of investment carries with it some advantages and disadvantages for investors.

Pros and Cons of Death Bonds - Financial Web

Death bonds (aka life settlement-backed securities, longevity derivatives, mortality bonds) are asset-backed securities, a new derivative based on the securitization of life insurance policies purchased from the elderly or the terminally ill. These new securities are mainly sold in Europe now, but more will be sold in the United States soon.

Death Bonds, Viatical and Life Settlements

Death bonds are securities that are formed from a number of life insurance policies that have been purchased from their original owners by investors and pooled into bonds.

Death bond - Wikipedia

Bonds linked directly to an insurer's reserves are known as "XXX," a name that comes from a regulation that officials use in setting reserve requirements. Another type of transaction involves "mortality catastrophe bonds," in which bond buyers contribute to pots of money that insurers can tap into if large numbers of people die in a disaster.

Death bonds - New York University

Death bonds are somewhat similar to catastrophe bonds. The bonds are issued by insurers and pay raucous rates of interest, but the insurer reserves the right to tap the money behind the bonds if more people than expected die. Some of these bonds directly tie your return to the death rates of a pool of the insured.
