Form follows function is a principle associated with modern architecture and industrial design in the 20th century. The principle is that the shape of a building or object should be primarily based upon its intended function or purpose. Architecture is not merely a slavery to the past art, not is it blind originality.

posted by John Spacey, June 09, 2016. Form follows nature is an architecture and design technique that uses shapes and forms found in nature such as plants, animals, insects, geological and astronomical shapes. Such techniques may achieve highly functional designs or may be purely aesthetic as a means of integrating with natural surroundings.

iCal. Louis Sullivan'saesthetic credo 'form follows function' became foundational to the modernistarchitectural movement. When it comes to structure, form relates to function and can enrich and even define architectural concepts. The lecture explains the principles of forms and structures and explores approaches where structural form supports and enhances architecture beyond its primary function.
