Global Production and Trade in the Knowledge Economy

At the heart of FAOSTAT lies the most comprehensive global collection of statistics in food and agricultural production and trade covering around 600 commodities and commodity groups.

ESS Website ESS : Production and trade

Abstract This paper argues that the determinants of the welfare gains from trade have fundamentally changed with the emergence of a global production network. Towards this end, we develop a novel counterfactual approach to decompose the welfare effects of any small trade cost variation in any general equilibrium model of international trade.

A theory of trade in a global production network

Over the past two decades, global patterns in tobacco production and trade have shifted dramatically. While research by tobacco control groups and public health organizations has focused on tobacco production and elucidated several key trends driving these shifts, considerably less is known about patterns of tobacco trade. Understanding the global tobacco economy—and the major players in it—depends on developing a more complete knowledge of all stages of the tobacco supply chain ...
