38 DIY Bee Hive Plans with Step-by-Step Tutorials (Free)

Set the box on the ground, scoop the bees up, and dump them into the box. Make sure the queen goes into the box and put the lid on. Make a barrier around the box (with about a foot gap) of something sweet that will distract any ants that would otherwise find your hive. Leave the box for 48 hours and return.

How to Make a Honey Bee Box (with Pictures) - wikiHow

Pollinated bees fly into beehives and start working for a while. When done, they exit the hive, increasing the honey level by 1. When the honey level has reached 5, the block's appearance changes, indicating that it is full of honey, and produces dripping honey particles if suspended above the ground. If shears are used on a full beehive, it drops three honeycombs.

Beehive - Official Minecraft Wiki

Frames and Foundations For a basic beehive, assemble two brood chambers that are 9 and 5/8 inches deep and two supers that are 6 and 5/8 inches deep. Make these boxes four-sided with no bottoms or tops. Place a queen excluder between the upper brood chamber hive body and the lower super hive body.
