**Pneumatic Punching  
Machine Project  
Report**

The pneumatic punching and riveting has been successfully completed with fullest satisfaction. We are optimistic based on the revolution, the machine is going to make in the pressing field. This project may be further developed into a unit with an automatic material handling system.

We propose to develop a compact pneumatic punching machine with enough torque to demonstrate hole punching through thin metal sheets. The purpose of this project is to study the punching mechanism and implement it with the help of pneumatic power. For this purpose we first construct a frame to withstand and
