Laravel 5.5 PHP 7.2 Postgresql 12.3 Ubuntu 18.4 Horizon for workers. My problem is that DB::disconnect() doesn't actually close the connection. My project have multiple database connection to Postgre and many jobs that use this connection. Inside the job I want to disconnect from the default connection and connect to a specific one.

### Laravel 5.5 close Postgresql database connection

In the last two posts we got Laravel up and running on Heroku, and then connected it with MySQL. But Heroku natively prefers PostgreSQL, and you'll find that PostgreSQL can do everything MySQL can do, and a lot more. So let's get it running on our Laravel Heroku app. Adding PostgreSQL to your Heroku app First, navigate to your app directory and add PostgreSQL as a Heroku add-on (if you haven't ...

### Laravel on Heroku - Using a PostgreSQL database ...

Laravel has a few system requirements. Now, these requirements have been satisfied by a laravel feature known as the Laravel Homestead which is a Vagrant virtual machine that provides Laravel developers with all the tools necessary to develop Laravel straight out of the box, that is useful in developing full scale web applications.
